Job Title
Network Engineer

About Algosystems
We are a reliable and dynamic systems integrator/service provider active in the technology areas of ICT, Cyber Security, Automation and Metrology. Our drive and enthusiasm comes from our people, which is why it is most important for us to recruit positive and confident professionals, who are passionate about their work and eager to be part of our success stories.

About the Role
As a Network Engineer, you will be part of a motivated team whose goal is to ensure our customers' access networks are secure and operational. You will be responsible for providing high quality services and complying with defined procedures.

Key Responsibilities
- Design and document network and security solutions
- Closely monitor customers' networks and systems equipment
- Collect data and act as 2nd level of support within a targeted timeframe
- Issue tickets to vendors and/or internal technical teams, and follow up until closure
- Engage in POCs based on customer needs
- Carry out routine network performance checks and maintenance tasks
- Maintain documentation and network inventory records

Qualifications and Work Experience
- Bachelor degree in Computer Science, Telecommunication Engineer or relevant field
- 1+ years of working experience in a similar role
- Prior working experience in a similar role will be considered a plus
- Cisco Certifications CCNA will be considered a plus
- Proficient in English and Greek

You are the right candidate if you possess the following core competencies:
- Ownership
- Analytical skills
- Problem solving skills
- Communication skills
- Multi-tasking skills

Benefits
- Competitive salary based on the candidate's qualifications and competencies
- Great working environment, including training and development
