

Talent Pool

WINGS is a company that delivers innovative, end-to-end digital solutions (software and hardware) and transformations for vertical sectors, namely; Environment / Nature, Utilities and Infrastructures, Production and Manufacturing and Service sectors, based on its extensive expertise in IoT, wireless infrastructures, AI and AR/VR.

Description

We are looking for motivated and enthusiastic talents to join our growing teams on innovative projects across various vertical sectors.

All current job openings are focusing on the development and implementation of end-to-end digital solutions using state-of-the-art technologies.

WINGS ICT Solutions is hiring **Software Developers** (Front-end, Back-end, Mobile), **Data Scientists, Hardware & Embedded Engineers, Research Engineers** (opportunity to partially work abroad), **Business Analysts, QA Testers, Presales and Bid Engineers, DevOps and IT Engineers.**

Daily activities:

- Collaborating with senior team members to analyze client requirements and provide digital solutions tailored to their needs
- Participating in the development, and deployment of software and hardware solutions, utilizing technologies such as IoT, AI, etc.
- Supporting the processes to ensure the reliability and effectiveness of digital solutions
- Participating in internal meetings, communicate project updates and gather feedback
- Staying updated on emerging technologies and industry trends to contribute fresh ideas and insights to project teams
- Contributing to documentation materials to support the adoption and maintenance of coherent digital solutions.

Educational requirements:

- Studies in the area of Information Technology, Digital Systems, Computer Science or other similar fields
- Master's degree in the aforementioned areas will be considered as a plus.

Necessary skills:

- Strong interest in digital technologies and their applications in vertical sectors such as Environment/ Nature, Utilities and Infrastructures, Production/ Manufacturing and Service sectors.
- Proven participation in relevant academic or personal projects (Thesis)
- Regarding the software roles: experience in coding (Python, Java, JavaScript, SQL, C, C++, .NET etc.)
- Excellent verbal and written communication skills both English and Greek

The key characteristics of a successful candidate will involve:

- Initiative, strong sense of accountability and ownership of actions
- Ability to work based on a certain time plan and methodology
- Effective time management and prioritization
- Agility, enthusiasm and flexibility

Benefits

- Highly competitive salary
- Remuneration based on your experience and skills, reviewed upwards on a regular basis, based on performance
- Participation in state-of-the-art and large-scale projects
- Personal and professional development, amongst industry experts
- Continuous learning
- Modern workspace, at a very good location
