

## YOUNG TALENT PROGRAM

An endeavor greece initiative that **connects tech universities and students directly with the market**

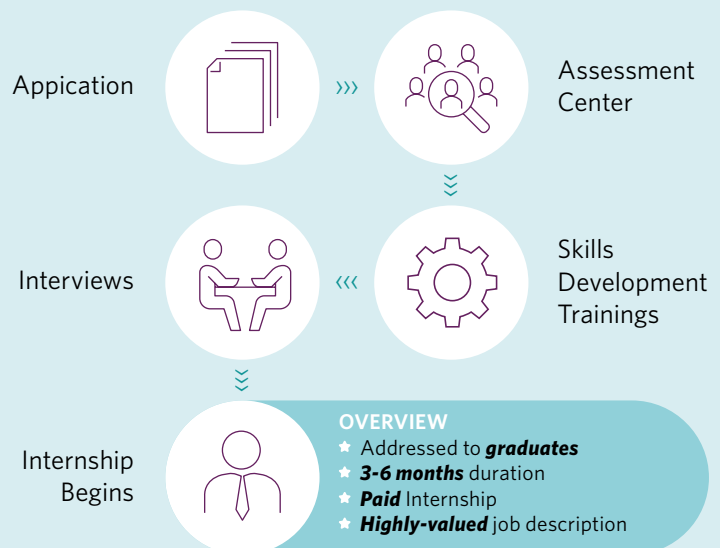

The Young Talent Program (YTP) is the only internship program in Greece solely aiming to bridge the gap and act as a single platform that **connects the most promising high-tech companies with tech-talent from top quality tech-departments of the Greek Universities and Colleges**. As the skills gap for high-tech roles continues to widen, the race to attract top tech candidates will only become more fierce, so anything to help source and connect with candidates more quickly will help companies beat out the competition for top talent.

### Challenges the program overcomes

- Greek students are not aware of fast-growing companies with an exceptional employer brand
- Universities are not well-connected with companies that embody successful acceleration in the workplace
- Universities' internship programs are not flexible
- There is no legal framework for quality internship programs
- Most of the existing internship programs are not well paid and the probability of employment following the internship is unlikely

### The journey of a Young Talent

### Join the program, become...

#### A SPONSOR

Are you a big technology company? Increase your employer brand awareness and stand-out as a top-quality tech talent ambassador.

#### A SUPPORTER

Are you a fast-growing tech company? Provide internship positions through the Young Talent Program and connect with high-quality tech-talents.

#### A COMMUNITY PARTNER

Are you in a University career office, research center, or student organization? Become our partner and help bridge the gap between tech-students and fast-growing tech companies.
