

## Company Overview

EMTECH is a group of SME companies (in Germany, Greece and Cyprus) interested in research and development for innovative products and high-tech services. Starting from cutting-edge projects, our aim is to prototype competitive products and develop innovative services in order to offer added-value to our clients and bring innovative solutions to the market.

Our products and services:

- Automation units, smart sensors and software offering the required components of Management Systems in the domains of Power Substations, Advanced Distribution and Distributed Energy Resources
- Decision Support Systems for Building Energy Management
- Space Software Engineering including Spacecraft Simulators and Ground Segment Software
- EMC and Magnetic cleanliness measurements & modelling services for space applications

EMTECH is built upon a culture of respect, honesty, teamwork, and a philosophy that ensures the provision of value and quality in every task we perform.

EMTech GmbH is currently incubated in Technologie- und Innovationszentrum (TIZ) in Darmstadt.
